

Explosive Results of pH Fusion Tea

New Evidence on Trehalose based pH Fusion

Greater health benefits than originally believed possible

Part 2 of 2 Glycoscience Lesson #45

by JC Spencer

What a wonderful world it would be IF we were able to buffer the pH level to ~7.3, open and shut the sodium ion gates in the cell membrane, and inject nano-size multi-trace minerals through the ion gates to stoke the mitochondria. That would have profound effects on all body chemistry, health, and the immune system, should we be able to accomplish that.

An acid state can lower body pH below 6.4 where enzymes do not function properly and the digestive system malfunctions. Acid decreases the ability to repair damaged cells and illness is inevitable. Low pH results in oxidation instead of oxygenation — rust instead of regenerate. Lack of oxygen causes glucose fermentation to lactic acid which compounds illness and addiction.

The acid environment requires the body to compensate by using alkaline minerals supplemented in the diet or they will be leached from bone. Osteoporosis and other diseases become the natural course of events which manifest as pain, arthritis, Chronic Fatigue Syndrome, Fibromyalgia, Lupus, or worse.

Cancer needs an acid / low oxygen environment to survive and flourish. British researchers treated patients with advanced kidney disease and metabolic acidosis by adding oral sodium to their protocol for two years. The sodium slowed the rate of decline in kidney function that resulted in 6.5%

required dialysis by the end of the study, compared to 33% in the control group.

We welcome athletes to participate in our Sports pH Fusion Tea Pilot Survey. This will provide evaluation of increase in sustained energy, improved performance, and reduced lactic acid buildup.

We designed pH Fusion Tea to be safe, nontoxic, and NOT raise blood pressure as does the sodium in salt (sodium chloride).

Our research continues to indicate slow-responders, hyper-responders and a few non-responders. Our objective is to always “Do No Harm” and determine ways and means to continue to have improved results and to provide safety free from any drugs.

Doctors, researchers, and interested individuals are welcome to help us gather more of our growing data to evaluate health benefits from the pH Fusion Tea Pilot Surveys. Individuals who wish to participate with Matched Funding may apply at <http://PilotStudies.net>.

No medical claims are made or intended and these statements have not been evaluated by the FDA.
